## EDUCATION

### Purdue University

*PhD in Electrical Engineering | GPA - 4.0/4.0*

Relevant Coursework: Random Variables and Signals, Wireless Communication Systems  
Linear Algebra, Digital Communication

West Lafayette, Indiana

*Jan 2024 – Now*

### National Institute of Technology Hamirpur

*B.Tech in Electronics & Communication Engineering | GPA - 9.72/10.0*

Hamirpur, India

*Aug 2014 – May 2018*

- The President of India Gold Medal (**Rank 1** in the institute)
- Director's Gold Medal for Best All Rounder Performer 2018

## WORK EXPERIENCE

### Qualcomm Inc.

*Senior Software Engineer - Modem NR5G*

Hyderabad, India

*Sep 2018 - Aug 2023*

- 5 years in Modem NR5G RF Software team. Primary task included analysing and reading 3GPP spec documents, and programming HW RF components like Antennas, PAs, LNAs, ASMs.
- Worked on Physical layer programming of RF front end Digital and Analog components.
- Created critical features and their SW frameworks, like ENDC (LTE + NR5G), NRDC (FR1+FR2, NR Dual Connectivity), MPE (Maximum Polarisation Exposure) on mmw.
- Worked with various OEMs on 40+ product lines. Assisted teams across geographies in USA, CHN, Israel and EMEA in day-to-day critical activities and Modem Bring ups.
- Got 2 promotions in 3 years. Was awarded with Orion-Insta and Qualstar Awards in the company for excellent performance and work-ethic (Highest Awards).
- Worked with cross-functional teams like Firmware, Modem Hardware, MAC, System Design, to design new features, test functionalities and enable data communication between various layers.
- NRDC framework created by me from scratch, was presented as a highlight (one of the five features) by Qualcomm CEO at the Mobile World Congress (MWC 2021), Barcelona. Download speed of **10 GBps** was achieved for the first time.

## RESEARCH EXPERIENCE

### Purdue University

*PhD Student | Advisor: Prof. Kim Kwang*

West Lafayette

*Jan 2024 - Ongoing*

- Working on Reducing Digital divide across Midwest states by quantifying difference in coverage i.e availability and in speeds, uplink and downlink amongst various ISPs and FCC BDC data.
- This difference between BDC data with Ookla speed database and the coverage data extracted from ISPs is then further correlated with the various demographic parameters from ACS Demographic Data and US Census bureau data to establish relationship between the digital divide and demographic variables in the Midwest states.
- A model is to be made predicting the state of Digital Divide in Midwest states for the year 2025. This will highlight how much is the deficiency of internet measured with a myriad of parameters like Average Household Income, Education levels, Urban/Rural Divide and Race.
- This model then can be applied on rest of the states across the United States. The 2025 prediction also assists the state to predict the divide in future and better allocate digital resources to eliminate the Digital divide in an optimal manner.

### IBT, Karlsruhe Institute of Technology (KIT)

*DAAD-WISE Scholar | Advisor: Prof. Olaf Dossel, Dr. Nicolas Pilia*

Karlsruhe, Germany

*May 2017 - Jul 2017*

- Instantaneous phase estimation and analysis of bio-signals including ECG and EEG signals to predict heart and brain disorders well in time [\[LINK\]](#).
- In a period of 3 months, formulated a novel method to predict heart and brain diseases timely, amalgamating benefits of conventional algorithms like Hilbert transform, Sinusoidal decomposition, Mattner method, Short-time Fourier transform etc.
- Performed mathematical analysis and took a comparative study of the novel method against the conventional methods available using various well-known Signal Processing algorithms.

## Indian Institute of Technology (IIT) Delhi

Delhi, India

Indian Academy of Sciences Research Fellow | Advisor: Prof. Subrat Kar

May 2016 - Aug 2016

- Tourist Assistance System to help geo-locate the tourists and assist them in the remote areas, devoid of any Mobile communication [\[LINK\]](#).
- Made a prototype with a bluetooth enabled system and a Mobile App interface to evaluate the last available coordinates of the user and through data-analysis, find the most probable radius, where the user may be found.
- Awarded with 'The Best Intern Project' award in the internship.

## ACADEMIC PROJECTS

---

### Real Time Smart Honking System

June 2016 – Apr 2018

- Created a prototype for a disincentive measure to control unnecessary honking on roads. Realised a system to produce a low beep sound in front treading vehicles in a span of 120°. Priority RF signals intimation for emergency vehicles.
- Conducted a study on Delhi roads which found the system to reduce the effective noise pollution by 65%
- Integrated with traffic control system, permitting the emergency to reach the desired destination without wasting time in the traffic.
- Got awarded as Most Innovative Project HP 2016 from Himachal Pradesh Government and received funding to file patent [\[Patent\]](#).

### SISO and MIMO System Model Reduction using heuristic algorithms

May 2018 – May 2020

- Applied various heuristic algorithms like Genetic Algorithm, PSO and Luus Jakola to reduce complexities of MIMO and SISO Models. [\[LINK\]](#).
- AGTM (Approximate Generalised Time Moments) method was implemented wherein the responses were matched at different time instants to achieve the reduced system.
- Devised a new method, Ensemble Framework for Optimized System (EFOS), resulting into a reduced system with better performance as compared to conventional techniques
- Designed Digital controller with reduced complexity using EFOS method

### IoT Enabled Smart Wearable Device

Apr 2016 – Mar 2017

- Smart Wearable assisting in daily activities and in emergency situations [\[LINK\]](#).
- Employed Sensors, cloud infrastructure, Mobile app and worked on ARM architecture

## TECHNICAL SKILLS

---

**Languages:** C, C++, MATLAB, Python, Embedded C, SQL, Latex

**Concepts:** Data Structure and Algorithms, Wireless Communication Systems, Cellular Communication, NR5G, Modem Communication

**Frameworks:** PyTorch, Perforce, Node.js, Jenkins, Qualcomm Tools

**Developer Tools:** Git, Docker, Visual Studio, JIRA, PyCharm, Eclipse

**Libraries:** NumPy, Matplotlib, Pandas, React

## LEADERSHIP AND AWARDS

---

- Secured 2nd rank at all INDIA at ADCOM ARM Design Contest 2015: Competed with 650+ teams nationwide [\[AWARD\]](#).
- DAAD-WISE Fellowship 2017: Given to top-100 meritorious students across India, accorded by the German government and EU to undertake research internship in Germany.
- Indian Academy of Sciences Research Fellowship 2016: Amongst Top 200 students to undertake research internship in premier institutes in India. Got selected at IIT Delhi (Only 4 applicants)
- SJVN Merit Scholarship 2014-2018: Accorded to 35 students who have topped in Senior Secondary examination across 5 Indian states. Awarded a four year scholarship to fund undergraduate studies.
- Founder and First President, Innovative Research Incubation Club (IRIC), NIT Hamirpur: Founded official Incubation center of NITH. Got sponsored by the Govt. of India and DST (Deptt. of Science & Tech), 3 of the projects got Chief Minister Startup Fund within first 6 month of the inception of IRIC.
- First Student Chair, IEEE Student Branch NIT Hamirpur
- Student Representative: ECE Departmental Under-Graduate Committee (DUGC): Represented student issues at DUGC for 2014 ECE batch, mediating and resolving issues between students and administration.
- President, Society of Promotions of Electronics Culture (SPEC): Technical team of ECE for college activities. Conducted SPECfest and won best team for 3 consecutive years.
